Welcome from ROBERT J. YOUNG, MD & JANE P. KO, MD

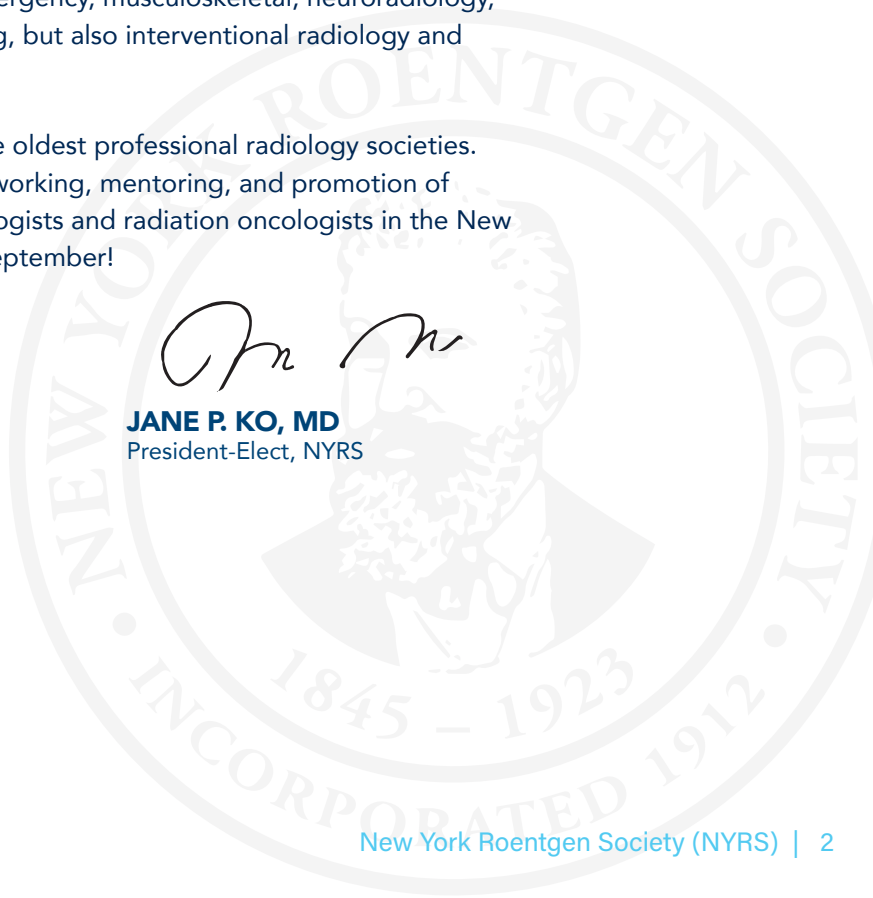

Please join us at this meeting sponsored by the New York Roentgen Society (NYRS) on September 28-30, 2022. Our exciting program includes an opening day hosted at the Zuckerman Auditorium at Memorial Sloan Kettering in the Upper East Side, with live in person case-based talks focused on pearls and pitfalls for clinical practice and quizzes across multiple subspecialties that will also be livestreamed. There will be a presentation by our 2022 Distinguished Radiologist awardee Dr. Peter Kim Nelson from New York University Langone Health and also a panel discussion on quality aspect in radiology.

Our Awards Event will follow that evening in Midtown Manhattan including recognizing our Distinguished Radiologist and feature the return of the popular mentoring match-up that debuted last year. The next two days will be fully virtual, with the familiar half day subspecialty sessions and live virtual question and answer to follow, with our esteemed faculty moderators and speakers. The content from the annual meeting will provide both CME and SAMS credits and spans the areas of abdominal, breast, cardiac, chest, emergency, musculoskeletal, neuroradiology, and nuclear medicine diagnostic imaging, but also interventional radiology and radiation oncology.

Founded in 1912, the NYRS is one of the oldest professional radiology societies. We are dedicated to the education, networking, mentoring, and promotion of training and practicing diagnostic radiologists and radiation oncologists in the New York City area. We hope to see you in September!
